

Brief Description

We, as a group have decided to create an evaluation system for cafe to rate their overall quality of customer service. This system consist of 4 cafe, each is done by every each one of our group member.

There are 2 targeted user for this system. First, the owner of the cafe can choose to add/change menu of his/her own cafe or see the menu currently available.

Second is the students. Student can rate the cafe's satisfactory level ranging from 1 to 5 and the average rating will be shown to user at the end of rating session.

Below is the flowcharts of the system
